SUMMARY

Software Engineer with 10+ years of experience in distributed systems and cloud-native architecture (.NET/Azure). Proven track record of high-scale impact, including saving \$1M+ annually through automation and leading technical standardization for 300+ engineers. Expert in Platform Engineering, AI-assisted development, and modernizing legacy financial ecosystems.

EXPERIENCE

Senior Engineer / Tech Lead · Siemens

Dec 2024–Present

Smart Infrastructure | Lisbon, Portugal

- Architected a centralized User Management platform integrating SAP, Salesforce, and ServiceNow, moving from scratch to production for global operations.
- Building a system of record for employee lifecycle and automated license management, projected to save \$1M+ annually in global operational costs.
- Leading global onboarding/offboarding automation, reducing manual operations and ensuring process consistency across multiple regions.
- Established an AI-assisted workflow using Specification-Driven Development (SDD) and GitHub Copilot agents, standardizing AI usage to accelerate team delivery.

Skills: .NET, Azure, Microservices, DDD, TDD, Bicep/ARM, AI-Assisted Development, Azure Monitor.

Staff Engineer - Platforms Architecture · Novabase (Fidelidade)

Apr 2021–Nov 2024

Lisbon, Portugal

- Led technical standardization across 17+ teams and 300+ engineers through platform engineering initiatives and monthly technical leadership forums.
- Built an Internal Developer Platform with reusable templates and CI/CD pipelines, eliminating 100% of logging-related rework and adopted by 70+ new projects.
- Designed an AI-driven issue analysis system (Jira + Azure OpenAI) reducing manual analysis by 70% for 300+ developers and identifying critical performance bottlenecks.
- Engineered a stream-based file management system to remove network transfer size limitations and a security analysis system covering 5,000+ projects.

Skills: .NET, Azure, Kubernetes, Docker, Azure OpenAI, Prompt Engineering, Observability, Kibana.

Senior Software Engineer · Agap2-IT (SoftFinança)

Jan 2020–Mar 2021

- Designed the initial architecture for a pharmacy marketplace using Clean Architecture and optimized core banking systems for credit card products.
- Optimized high-volume transactional queries by refactoring LINQ compositions, reducing API latency by 40% and decreasing database CPU utilization during peak hours.

Senior Software Engineer · Mtechne (Ticket)

2019–2020

- Architected an event-driven Transaction HUB that processed 900K transactions daily, ensuring 99.9% availability for e-commerce checkout services through DDD and TDD practices.
- Applied DDD and TDD to model complex business rules, ensuring high reliability for e-commerce checkout and processing services.

Senior Software Engineer • Vizir / Deal

2017–2019

- Built a global onboarding platform for Natura, supporting multi-country operations and payment gateway integrations.
- Designed a cloud-based B2B loyalty platform supporting multi-tenant gamification, cashback, and point-based incentives.

Software Engineer (Early Career) • Various Companies

2012–2017

Eris, FCamara, Confitec, Prodesp, Vizir, Deal

- Developed enterprise-scale systems (ERP, Financial, Energy) for public and private sectors. Built a solid foundation in distributed services, asynchronous communication (RabbitMQ/Kafka), and SQL optimization, transitioning from monolithic architectures to cloud-native patterns.

SKILLS

Technical	.NET, Microservices, DDD, TDD, CI/CD, SQL Server, Oracle, CQRS.
Cloud/Platform	Azure (Functions, SQL, Monitor), AWS (Lambda, API Gateway), Kubernetes, Docker.
Tools	RabbitMQ, Kafka, Observability, Prompt Engineering, GitHub Copilot Agents.

EDUCATION & CERTIFICATIONS

M.Sc. in Computer Engineering

2025 – Present

University of Evora, Portugal

Associate Degree in Systems Analysis

2013 – 2015

Cruzeiro do Sul University, Brazil

Microsoft Certified: Azure Developer Associate (AZ-204)
